Redesign any space for social distancing

Leverage existing space division screens on desks and benches. Light and easy to install, the retrofitting extensions provide an immediate and low-investment solution for additional protection at the workstation.

Retrofitting shields are polycarbonate or cardboard extensions that can be easily integrated on existing screens.

STATEMENT OF LINE

The transparent polycarbonate version allows for full transparency and is easy to clean. The cardboard shield features a soft-edge design and is 100% recyclable, thus providing an environmentally friendly option that is easy to dispose of after use.
